If there is any questions please feel free to call our office for assistance.

Thank you.

BL/65

Bob Lewis

## Memorandum

To Board of Works - Attn: Dr. Boswell & Ron Bonar Date 1/18/74  
From Mort Mendel, General Superintendent, City Utilities  
Subject PURCHASE ORDER - TRENCHING MACHINE FOR LIGHT CONSTRUCTION

COPIES TO:

Jim Lee

Sometime ago, Mr. Bonar brought to our attention the ongoing trenching work demands resulting from the expanded street lighting program of the Board of Works. Field site reviews established that it would be very desirable to acquire a trenching machine with rubber traction tires instead of caterpillar track, in view of park strip lawn and driveway damage often caused by track trenched.

Further investigation has established that Light Construction has two trenchers; one is a 1963 Ditch Witch track type trenched, and trailer, and a second unit is a Davis 1968 track type trenched.

We plan to trade in the Ditch Witch for a new wheel type trenched, since it is the oldest unit and in poorer condition than the Davis.

In reviewing both Ditch Witch and Davis wheel type models in field test and demonstrations, we have concluded that it would be more desirable to acquire the Davis wheel type unit for two primary reasons:

- (1) The boring attachment unit utilized for underground conduit construction need not be removed when needed for use, as is the case with the Ditch Witch unit, i.e. trenching and/or boring can be performed by the Davis unit without loss of time needed for removing and installing the boring unit.
- (2) Flush digging attachment and maneuverability of Davis unit is superior to Ditch Witch unit.

Attached is a Purchase Order for the above unit and we request Board of Works and councilmanic approval.

This unit is being submitted separately from "Phase II" rolling stock procurement recommendations because it is primarily related to the street lighting program.

Encl.

## DIGEST SHEET

## City Utilities

S-74-02-15

TITLE OF ORDINANCE: City Utilities Purchase Order #3243DEPARTMENT REQUESTING ORDINANCE: Board of Public WorksSYNOPSIS OF ORDINANCE: Request approval for the purchase of a trenching machine from Bremer's, Inc. for use by Light Construction.

Specifications and quotes attached. The bid from Bremer, Inc. is the higher bid. Per Mort Mendel, after reviewing both Ditch Witch and Davis wheel type models in field test and demonstrations, he has concluded that it would be more desirable to acquire the Davis unit for two primary reasons:

1. The boring attachment unit utilized for underground conduit construction need not be removed when needed for use, as is the case with the Ditch Witch unit, i.e. trenching and/or boring can be performed by the Davis unit without loss of time needed for removing and installing the boring unit.
2. Flush digging attachment and maneuverability of Davis unit is superior to Ditch Witch unit.

EFFECT OF PASSAGE: Will be able to purchase a more up to date trenching machine.

EFFECT OF NON-PASSAGE: Will have to continue working with an old model which is in poor condition.

MONEY INVOLVED (Direct Costs, Expenditures, Savings): \_\_\_\_\_

Total cost to City Utilities: \$6,300.00

ASSIGNED TO COMMITTEE (J.N.): \_\_\_\_\_
